

# TERRAGARD RC 888

## Engine Water Coolant Inhibitor

- Description** **TERRAGARD RC 888** is a yellowish green liquid, an organic solvent blend for corrosion and scale prevention inhibitor Engine Cooling water system, such as for Automotive Radiator and Diesel Engine. Features :
- Soluble in water, protects ferrous and nonferrous metal
  - Non flammable, produces a semi permeable, chemically bonded monomolecular barrier
  - It will also lubricate seal pump and other metal
  - Will save maintenance cost, and smoothening engine run
  - Will lower the freexing point on and preventing from frozen of the water coolant in cold weather

### Properties

Appearance	Yellow to green liquid
pH	6.0 – 8.0
Sp. Gravity at 25 DEG C	1.00 – 1.15
Solubility	Completely soluble in water

### Dosage and Feeding

- Recommended to flush Engine Coolant/Radiator with *radiator cooling system cleaner* before applying **TERRAGARD RC 888** (for already run engine without treatment)
- To be used at 33,3 % of total water in the system, and additional of same concentration for topping up the system
- To retain the correct concentration of TERRAGARD RC 888 can be monitored by Nitrite concentration, a test kit is available

### Handling and storage

Wear protective goggles and rubber gloves, when handling. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush with plenty of water. And for eyes, get medical attention immediately.

### Packaging

In plastic container with net weight 25 liters/pail or 200 liters/drum.
